

# Bentonite CX GEL

Bentonite CX GEL is widely used in the mineral exploration, pipe jacking and water well drilling industries as a primary filter cake building, filtration control and suspension agent in fresh water systems. It provides great stability even in poorly consolidated formations and prevents fluids loss during the filter cake building process and is extremely effective viscosifier in fresh and brackish water. It can also be used alongside other drilling mud products.

## Advantages:

- Stabilizes the borehole
- Improves hole-cleaning capacity of drilling fluids
- Reduces fluid loss into the formation
- Is environmentally responsible

## Recommended Industries

- Mineral Exploration
- Pipe Jacking
- Water Well Drilling
