

Bentonite SUPER-GEL

Bentonite SUPER-GEL is a high-yield, 200 mesh sodium bentonite with a special dry polymer additive that mainly used in trenchless industry with very high viscosity. It is used as a primary filter-cake-building, filtration-control and suspension agent in freshwater systems, and has application in all water-base mud systems.

Advantages:

- Stabilizes the borehole
- Improves hole-cleaning capacity of drilling fluids
- Reduces fluid loss into the formation
- Is environmentally responsible
