

Detergent CX-DET

CX-DET is a concentrated blend of detergents which improves the drilling characteristics of low solids and water based mud.

Advantages:

- Added directly to the mud system
- Is non-toxic and does not ferment
- Environmentally friendly and biodegradable
- Disperse a build up of solids in diamond drill rods
- Used for dispersing the build up of drilled solids in the bit
- Reduces torque and drag associated with drilling in swelling clays
- Reduce bit balling and drill rod collaring in soft sticky formations

Recommended Treatment:

Add CX-DET in concentration of 5.0 to 9.0 liters to 1000 liters to air drilling fluid. Mix slowly through a jet mixer or sift slowly into the vortex of a high-speed stirrer.
