

Anti-Temperature and Salt Fluids Loss Control Agent HIPOLY

HIPOLY is a synthetic polymer specifically designed for high-temperature and high-salinity environments. It can stand more than 240°C (460°F)

Advantages:

- Environmentally friendly and biodegradable
- Works well at any salinity
- Reduces differential sticking tendencies
- Increases the effectiveness of solids-control equipment
- Used in harsh environments
- Improves thermal stability of whole mud system
- Non-fermenting
- Inhibits shale

Recommended Treatment:

Add HIPOLY in concentration of 5-15 kg/m³ to drilling fluid.
Mix slowly through a jet mixer or sift slowly into the vortex of a high-speed stirrer.
