Electric Water Pump

The revolutionary range of Davies, Craig's patented Electric Water Pumps are performance accessories suitable for most makes of engines.

There are two models available: the EWP®80 (80 litres per minute) suitable for engines up to 3.0L and the EWP®115 (115 litres per minute) for larger, more powerful engines and 4WDs. They are designed to replace a vehicle's existing mechanical belt-driven water pump. Both models are simple, fit-it-yourself electric water pumps - lightweight, compact, more powerful design suitable for small, large, plus high-performance cars and 4WD vehicles.

They are vital performance products that improve engine cooling management while giving more power and torque and evenly dissipating heat soak. All deliver 3% to 5% improved fuel economy while lowering environmental impact by reducing emissions. The EWP®80 is sufficient for use as a 'booster' to your existing mechanical pump.

Options for pump control

1. Use in conjunction with EWP®/Fan Digital Controller

The Digital Controller has a micro-processor which will run the EWP® at exactly the right flow rate maintaining your set, targeted engine temperature.

2. Use in conjunction with Thermal Switch

Combine the EWP® with an adjustable Thermal Switch to add a cooling boost to an overheating mechanical pump cooling system.

3. Continuous Running

Wire the pump to the ignition for maximum cooling - suitable for race vehicles, very hot climates and chronically overheating engines.

Electric Water Pump Kits are supplied with everything you need for DIY installation, including easy-to-understand instructions.

The many benefits of the EWP® include:

- increased power and torque
- increased cooling capability
- eliminating heat soak
- better control of engine temperature
- flexible options for pump control

Electric Booster Pump

The EBP® (Electric Booster Pump) is a 'brushless' 12 volt, high-flow, magnetically-driven water pump. The EBP® motor has no brushes to wear out-ever-and the pump is magnetically driven by the motor, which means that no shaft sealing is required. There is only one moving part, the impeller, and it is floating in the coolant. The pump chamber is hermetically sealed for trouble-free operation.

The EBP's ease of installation, low-current draw, high-flow capacity and long life make it ideal for a range of applications.

The kit (part #9001) comes with everything you need for easy installation including, easy to understand, do-it-yourself instructions.

The many EBP® applications include:

- booster for car heater and LPG systems
- air-to-water intercoolers for turbo cars
- solar pump applications
- water-cooled motorcycle, go kart engines
- turbo air/water intercoolers
- household irrigation

EW8005

- Electric Water Pump 12V Nylon
- 80 litres per minute
- Suits engines up to 3 litres
- Includes fitting Kit

EW8005

- Electric Water Pump Kit 12V Nylon
- 80 litres per minute
- Suits engines up to 3 litres
- Includes fitting Kit and electronic controller

EW8016

- Electric Water Pump 24V Nylon
- 110 litres per minute
- Suits many 24V applications
- Includes fitting Kit

EW8020

- Digital Controller 12V
- Suits 12V 80 & 115 l/m electric water pumps
- Varies speed of pump according to coolant temperature
- Also controls electric fan operation

EW8025

- Electric Water Pump 12V Nylon
- 115 litres per minute
- Suits all engines including V8s and 4WD
- Includes fitting Kit

EW8026

- Electric Water Pump 24V Nylon
- 115 litres per minute
- Suits many 24V applications
- Includes fitting Kit

EW8030

- Electric Water Pump Kit 12V Nylon
- 115 litres per minute
- Suits all engines including V8s and 4WD
- Includes fitting Kit and electronic controller

EW8040

- Electric Water Pump 12V Aluminium
- 115 litres per minute
- Suits all engines including V8s and 4WD
- Includes fitting Kit

EW8050

- Electric Water Pump Kit 12V Aluminium
- 115 litres per minute
- Suits all engines including V8s and 4WD
- Includes fitting Kit and electronic controller

EW9001

- Electric Booster Pump 12V Nylon
- 15 litres per minute
- For use with conventional or electric water pump
- Enhances performance of heater and/or LPG

The Tru-flow range is the most comprehensive water pump range in Australia ...

A vast majority of Tru-flow's range is sourced from GMB Japan, with the remainder of the pumps being sourced from O.E quality manufacturers in Japan, Korea, Italy, USA and the UK.

In this section you will find over 1500 part numbers, covering almost 1600 different vehicle applications.

The comprehensive range alongside excellent cataloguing, technical support and a 2 year / 40,000 km warranty makes Tru-flow the market leader and the brand of choice.

Be confident with Tru-flow...

TRU-FLOW

- Water Pumps
- Fan Clutches
- Heater Taps

TF2369 *Alfa Romeo*
 75 Twin Spark, 1/88-12/92
 Suits: 062.24 (4cyl, 2.0L)

Special order only
