

Lubricant Linseed Soap

Linseed Soap is an amber colored opaque paste lubricant which can be used in mining, drilling operations as Core Lubricant

Advantages:

- Effective in fresh water, salt water, and brine-based fluids
- Controls fluid loss
- Inhibits hydratable, swelling shale
- Environmentally compatible
- Does not require a bactericide
- Easily mixed into low shear environment

Recommended Treatment:

- As aid in core recovery: Smear Tube Lube inside the bottom of the inner tube before it is inserted into the drill rods. Also can be used to the core lifter parts.
- As a cleaning solution for drill rig components: Mix 5 liters of Linseed Soap lubricant per m³ of water.
