

Liquid Thinner THN

THN is a highly efficient and concentrated thinner to remove bentonite clays from the drillstring and reduce drilling fluids viscosity. THN immediately affects the rheology of most drilling fluids.

Advantages:

- Functions at all pH levels
- Immediate thinning action
- More cost-effective than traditional thinners
- Safe to use on most plastics, rubber and metals
- Reduces gel strength to drop out solids
- Thermally stable in excess of 177°C
- Can reduce pumping costs

Recommended Treatment:

Add THN in concentrations of 4. to 5.0 liters per 1000 liters to drilling fluids. Thinning:
Slowly add THN to the mud as needed to reduce viscosity.
